

SUPPORTING EUROPEAN ECONOMIC AREA (EEA) EMPLOYEES

EmployLaw’s specialist immigration service can help you safeguard your workforce by supporting your EEA national employees and their family members through the uncertain times of Brexit and beyond.

We offer a range of services to match your needs and budget.

DOCUMENTATION APPLICATION SUPPORT

We can assist with applications for documentation of EEA rights. Our team has worked with the Home Office to refine the application processes and has extensive experience in making EEA applications.

For those EU national employees who can evidence employment, and who do not have adverse criminal or immigration histories, we are able to offer a streamlined service.

ONE-ON-ONE SURGERIES

We are able to offer personal sessions with individual employees at your offices. Each employee can sit down with an expert to discuss their situation and get advice. This service often works well in combination with our hotline service.

HOTLINE SERVICE

Make expert advice available to your employees over the phone.

TRAINING

We offer training in a range of formats to suit your and your employees’ needs. Whether you would like a theatre-style presentation or a more intimate roundtable forum focusing on a question and answer session, we would be happy to provide you and your employees with the knowledge you need to ensure fitness for the future.
